

Write a fraction for each of the following pictures:

Notice how the fractions are different, but the values are the same. They are equivalent fractions.

You can also multiply to find equivalent fractions with denominators of 10 and 100:

$$\frac{3 \times 10}{10 \times 10} = \frac{30}{100}$$

$$\frac{7 \times 10}{10 \times 10} = \frac{70}{100}$$
